

Stage 5 Industrial Technology - Timber

200-hour family syllabus coverage record | NESA implementation is from 2028; Steve's selected 2027 early-implementation planning candidate | v2.0

Official syllabus	Industrial Technology 7-10 Syllabus (2025)	Required content	82 statements
Supplied master	28 statements explicit	v2 additions	54 statements explicitly allocated
Course requirement	At least 4 projects + documentation	Collaborative activity	Teacher to confirm locally

Authority boundary: this record makes every required content statement visible in the 2027 planning candidate. The supplied master remains the timing source. Teachers confirm final sequencing, practical authority, culturally safe sources, collaboration and assessment before delivery. The 2026 assessment pathway remains separate.

Official Stage 5 outcomes

Outcome	Exact official wording
INT5-SAF-01	applies risk management and safe work practices in industrial technology contexts
INT5-COM-01	communicates ideas and processes in industrial technology contexts
INT5-ENV-01	assesses the impact of industrial activities and practices on society and the environment
INT5-DES-01	selects and applies design, project management and technical skills in project production
INT5-USE-01	selects and justifies the use of materials, tools and equipment to undertake projects
INT5-EVL-01	evaluates the functional, aesthetic, economic and environmental qualities of products
INT5-INP-01	analyses and applies a range of industrial processes in production contexts
INT5-PRO-01	demonstrates practical skills in the production of projects
INT5-IND-01	investigates and explains a range of industry careers, enterprise opportunities and practices

Timber industry: Project development | Work health and safety and risk management

Work health and safety and risk management Required content	Family anchor	Evidence / teacher check	Program state
Identify the role of SafeWork NSW, regulations, standards and codes of practice in maintaining a safe workplace Outcomes: INT5-SAF-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named risk/SOP response and record teacher observation before authorised practical work.	Existing master
Recognise and comply with work health and safety (WHS) documentation and signage , and follow WHS rules when designing or producing Outcomes: INT5-SAF-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named risk/SOP response and record teacher observation before authorised practical work.	Existing master
Outline the principles of risk management and implement risk-reduction procedures Outcomes: INT5-SAF-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named risk/SOP response and record teacher observation before authorised practical work.	Existing master
Describe first aid procedures and outline the procedure to follow after particular incidents Outcomes: INT5-SAF-01	Breadboard	Check the named risk/SOP response and record teacher observation before authorised practical work.	v2 allocation

Timber industry: Project development | Project design

Project design Required content	Family anchor	Evidence / teacher check	Program state
Outline the importance of Indigenous Cultural and Intellectual Property (ICIP) of Aboriginal and/or Torres Strait Islander Peoples and how it is related to relevant projects Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Tool Carry-all, Mirror	Use a culturally safe, teacher-approved source; check the student's sourced explanation and project connection.	v2 allocation
Investigate materials, technologies, sustainable development and Practices used to inform design solutions by Aboriginal and/or Torres Strait Islander Peoples Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Use a culturally safe, teacher-approved source; check the student's sourced explanation and project connection.	Existing master
Identify and investigate factors influencing design in projects to develop specifications Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Use Australian regulations, standards and codes of practice when designing and producing Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Use, modify and create designs to complete projects Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Identify sustainable materials, technologies and practices when designing projects Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Tool Carry-all, Bedside Table, Clock, Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Test and evaluate the suitability of materials and the effectiveness of tools, equipment and processes Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Evaluate the effectiveness of design on the quality, function and aesthetics of finished products Outcomes: INT5-DES-01, INT5-EVL-01, INT5-ENV-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master

Timber industry: Project development | Project management

Project management Required content	Family anchor	Evidence / teacher check	Program state
Select and document materials, equipment and processes used to make components or projects Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01	Bedside Table	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Prepare materials lists and calculate quantities and costs when making projects Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01	Bedside Table	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Apply project management strategies when developing projects Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01	Bedside Table	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Propose, apply and evaluate plans for production, using project management tasks and tools Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01	Tool Carry-all, Bedside Table, Clock	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master

Project management Required content	Family anchor	Evidence / teacher check	Program state
Outline and apply a quality management system to support production processes including testing, quality assurance and quality control Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01	Tool Carry-all, Bedside Table, Timber Pen, Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Identify and allocate roles for collaborative production processes Outcomes: INT5-DES-01, INT5-INP-01, INT5-PRO-01, INT5-COM-01	Tool Carry-all, Bedside Table, Timber Pen, Mirror	Approve one genuine collaborative activity; record roles, contribution, handover and teacher observation.	Existing master

Timber industry: Project development | Project communication

Project communication Required content	Family anchor	Evidence / teacher check	Program state
Use subject-specific terminology to communicate industrial technology concepts Outcomes: INT5-COM-01	Clock	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Discuss the importance of graphical literacy for communication across industries Outcomes: INT5-COM-01	Clock	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	v2 allocation
Apply a range of graphical communication techniques including freehand sketching, diagrams, graphs, charts or computer-aided design (CAD) software during project development Outcomes: INT5-COM-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Use digital technologies to develop and communicate ideas Outcomes: INT5-COM-01	Tool Carry-all	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Create written texts to document, reflect on and evaluate project development, production and management processes Outcomes: INT5-COM-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Timber Pen, Mirror	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Demonstrate digital literacy and information management skills when working with digital systems and in online environments Outcomes: INT5-COM-01	Clock	Check the named design, planning, costing, communication or evaluation evidence in the project folio.	Existing master
Develop and apply safe data management practices when collecting and storing data Outcomes: INT5-COM-01	Clock	Check the named risk/SOP response and record teacher observation before authorised practical work.	v2 allocation

Timber industry specialisation | Materials and resources

Materials and resources Required content	Family anchor	Evidence / teacher check	Program state
Investigate the sources, harvesting, conversion methods and seasoning of timbers used in timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Explain the role of Country in the provision and management of timber materials for production Outcomes: INT5-USE-01, INT5-ENV-01	Tool Carry-all, Mirror	Use a culturally safe, teacher-approved source; check the student's sourced explanation and project connection.	v2 allocation
Discuss ethical responsibilities when sourcing materials for timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Investigate sustainable practices in the timber industry Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Investigate old-growth timber and the implication of its use in timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Explain the environmental and societal impact of resources used in the development and production of timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Identify the types of timber stock, including rough sawn and dressed timber, veneers and manufactured boards, and their uses Outcomes: INT5-USE-01, INT5-ENV-01	Clock	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Investigate the production, use and environmental impact of manufactured boards including blockboard, chipboard, hardboard, medium-density fibreboard (MDF) and plywood Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Investigate how recycled or repurposed materials are used in a timber-based project Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation

Timber industry specialisation | Materials and resources (continued)

Materials and resources (continued) Required content	Family anchor	Evidence / teacher check	Program state
Compare properties and characteristics of hardwoods and softwoods, including grain, weight, density and texture, to justify their selection for specific timber components or projects Outcomes: INT5-USE-01, INT5-ENV-01	Bedside Table, Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	Existing master
Identify secondary materials that could be part of a timber-based project, including metals, ceramics, polymers and upholstery Outcomes: INT5-USE-01, INT5-ENV-01	Clock, Mirror	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation

Materials and resources (continued) Required content	Family anchor	Evidence / teacher check	Program state
Identify a range of hardware components and their function for application in timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Bedside Table	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Compare the properties of different glues and adhesives, including strength, gap-filling properties, working time and shelf life, and explain the advantages and disadvantages of each when assembling timber projects Outcomes: INT5-USE-01, INT5-ENV-01	Mirror, Bedside Table	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation
Explain the advantages and disadvantages of a range of finishes to enhance a completed timber project Outcomes: INT5-USE-01, INT5-ENV-01	Mirror, Bedside Table	Check a justified material/resource decision supported by the project and a saved written response.	v2 allocation

Timber industry specialisation | Tools and equipment

Tools and equipment Required content	Family anchor	Evidence / teacher check	Program state
Investigate tools used by Aboriginal and/or Torres Strait Islander Peoples to manipulate timber Outcomes: INT5-SAF-01, INT5-USE-01	Tool Carry-all, Mirror	Use a culturally safe, teacher-approved source; check the student's sourced explanation and project connection.	v2 allocation
Identify a range of marking-out, cutting, shaping, forming, machining, detailing, finishing and assembly tools used to make components or projects Outcomes: INT5-SAF-01, INT5-USE-01	Tool Carry-all, Bedside Table, Clock, Timber Pen, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Perform safe set-up of tools and equipment, relevant to the project, including inspecting and adjusting guards before use, following standard operating procedures (SOPs) and safety data sheets (SDSs), calculating speed and feed rates for machine processes, securing work pieces, ensuring battery and cable care, or using dust control measures Outcomes: INT5-SAF-01, INT5-USE-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Check the named risk/SOP response and record teacher observation before authorised practical work.	Existing master
Maintain hand tools and equipment, including cleaning, lubricating or replacing consumables, such as blades, bits and abrasives Outcomes: INT5-SAF-01, INT5-USE-01	Clock	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Create written texts to explain the practical applications and safety requirements of a range of tools and equipment Outcomes: INT5-SAF-01, INT5-USE-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Timber Pen, Mirror	Check the named risk/SOP response and record teacher observation before authorised practical work.	Existing master

Timber industry specialisation | Processes, techniques and applications

Processes, techniques and applications Required content	Family anchor	Evidence / teacher check	Program state
Demonstrate safe workshop practices and procedures when using materials, tools and equipment in timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Check the named risk/SOP response and record teacher observation before authorised practical work.	v2 allocation

Processes, techniques and applications Required content	Family anchor	Evidence / teacher check	Program state
Select and use personal protective equipment (PPE) when working with tools, materials and machines Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Check the named risk/SOP response and record teacher observation before authorised practical work.	v2 allocation
Apply ethical protocols when making timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Select and use appropriate timbers for the construction of timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Apply quality checks to assess timbers and components for defects before, during and after production Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Select and use a range of marking-out tools, processes and equipment to accurately measure and mark out materials when making timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Prepare timber using appropriate hand tools and machines Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Use drawings, jigs or templates, relevant to the project, in the manufacture of components and assemblies Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Use appropriate hand tools, portable power tools or machines when cutting, shaping, forming, machining or detailing to make timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Timber Pen, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master

Timber industry specialisation | Processes, techniques and applications (continued)

Processes, techniques and applications (continued) Required content	Family anchor	Evidence / teacher check	Program state
Investigate advanced manufacturing techniques to assist in the production of projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Clock, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Use digital design tools to develop timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Compare the machining properties of solid timbers and manufactured boards Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Prepare timber and set up timber lathe for wood-turning processes, such as between centres, chuck turning and faceplate turning Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Timber Pen	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation

Processes, techniques and applications (continued) Required content	Family anchor	Evidence / teacher check	Program state
Apply safe practices when wood-turning, including checking timber for cracks and defects, checking laminated stock, checking workpiece mounting and clearance, removing tool rest when sanding Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Timber Pen	Check the named risk/SOP response and record teacher observation before authorised practical work.	v2 allocation
Use appropriate tools and processes to turn timbers, such as cutting, scraping and sanding Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Timber Pen	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Apply appropriate board-widening techniques, such as butt, dowelled butt joint, tongue and groove, groove and feather, or biscuit joint Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Apply appropriate carcass framing and box joints, such as rebate, mitre, housing, finger, dovetail, bridle or mortice and tenon Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Select and use a range of glues or adhesives to assemble parts and components in timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master

Timber industry specialisation | Processes, techniques and applications (continued)

Processes, techniques and applications (continued) Required content	Family anchor	Evidence / teacher check	Program state
Assemble parts and components using fixings, adhesives or clamps to make timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all, Bedside Table, Clock, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Apply skills and processes to make quality projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Use techniques to ensure the precision and quality of components Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Use traditional and digital technologies to create components and detail surfaces for timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Mirror, Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Outline the processes to apply appropriate finishes Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Mirror, Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation
Prepare working environments for the production, finishing and assembly of timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Mirror, Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation

Processes, techniques and applications (continued) Required content	Family anchor	Evidence / teacher check	Program state
Compare processes, techniques and equipment used in industry to those found in the classroom Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all, Bedside Table	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Investigate the characteristics, properties, methods of cutting and uses of veneers in timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Clock	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Use hand tools, power tools, machinery, chemicals and abrasives to prepare timber surfaces for the application of finishes Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Tool Carry-all, Bedside Table, Breadboard, Clock, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master
Apply a range of appropriate finishing techniques to enhance or protect a completed timber product Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Mirror, Bedside Table	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	v2 allocation

Timber industry specialisation | Processes, techniques and applications (continued)

Processes, techniques and applications (continued) Required content	Family anchor	Evidence / teacher check	Program state
Use collaborative production processes to make components for timber projects Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01, INT5-COM-01	Tool Carry-all, Bedside Table	Approve one genuine collaborative activity; record roles, contribution, handover and teacher observation.	v2 allocation
Evaluate the impact of manufacturing processes on the quality of finished timber products Outcomes: INT5-PRO-01, INT5-INP-01, INT5-USE-01	Bedside Table, Breadboard, Clock, Mirror	Confirm the current plan and safe method; check the named response, project evidence or teacher observation.	Existing master

Timber industry specialisation | Timber industry in context

Timber industry in context Required content	Family anchor	Evidence / teacher check	Program state
Investigate and apply work and enterprise skills required in the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Bedside Table, Clock, Mirror	Check a sourced industry, enterprise or career investigation linked to the active project.	Existing master
Identify ethical, cultural and sustainability practices used in the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Mirror	Use a culturally safe, teacher-approved source; check the student's sourced explanation and project connection.	v2 allocation
Investigate issues relating to the sustainability of resources in the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Bedside Table	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Describe new and emerging technologies and their influence on the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Clock, Mirror	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Describe the effects of the timber industry on society and the environment Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Bedside Table	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation

Timber industry in context Required content	Family anchor	Evidence / teacher check	Program state
Discuss how timber industry practices evolve in response to changes in technology, society and the environment Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Bedside Table	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Explore trade and career opportunities across the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Tool Carry-all, Bedside Table	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation
Evaluate the impact of new and emerging technologies on careers and professions in the timber industry Outcomes: INT5-IND-01, INT5-ENV-01	Clock, Mirror	Check a sourced industry, enterprise or career investigation linked to the active project.	v2 allocation

Teacher-to-confirm register

ID	Decision to confirm
TTC-01	Confirm the final master sequence, period distribution and named learning activity for each v2 allocation before delivery.
TTC-02	Confirm current project plan, induction, SOP/SDS, materials, equipment, PPE, supervision and risk controls before each practical.
TTC-03	Approve at least one genuine collaborative activity and the evidence used to show individual contribution.
TTC-04	Confirm culturally safe, local and appropriately authorised sources and protocols for Aboriginal and Torres Strait Islander content.
TTC-05	Confirm task authority, outcomes, marks, dates, conditions, adjustments and submission route before formal assessment use.
